Ag. CHIEF INSPECTOR OF MINES IN MYSORE.

GEN. & REV. SECRETARIAT. 160 6 JULY 1928 DEVELOPMENT BRANCH.

To

N. Rama Rao, Esq., B.A., B.L.,
Secretary to the Government of
His Highness the Maharaja of Mysore,
Development Departments, Bangalore.

Sir,

I have the honour to state that certain amendments to the Indian Explosives Rules, 1914, have recently been made regarding Picr Acid and Picrates. As the Rules under the Mysore Explosives Regulati have been modelled on those in force in British India, it is necessar that the Mysore Explosives Rules should be suitably amended in this respect to bring them into line with those obtaining in the adjacent British Indian Provinces.

Accordingly, under Section 4 of the Mysore Explosives Regulation, I request that Government may be pleased to direct that the accompanying amendments be made to the Mysore Explosives Rules, 1917, the same being previously published in the official Gazette as required by Section 15 of the said Regulation.

I have the honour to be,

Sir,

Your most obedient servant,

C E S Rau

Ag. CHIEF INSPECTOR OF MINES
IN MYSORE.

Addendum to Rule
6. Division 2(i) - chap. II

DRAFT AMENDMENT.

Add a Note at the end of Rule 6, Division 2 (i) of Nitro-compound Class of Explosives - Chapter II, Classification of Explosives - as under:-

Note: Picric acid, picrates and mixtures of picric acid shall be deemed to be explosives subject to the following exceptions, viz:-

(a) Picric acid or a picrate when mixed with not less than one half of its own weight of water shall not be deemed to be an explosive.

(b) Picric acid when thoroughly mixed with not less than three times its own weight of -

(i) anhydrous sulphate of soda, or

(ii) crystallized sulphate of soda, and packed in hermetically closed packages, or

(iii) potash alum, shall not be deemed to be an explosive.

(c) Picric acid when the quantity does not exceed one ounce shall not be deemed to be an explosive, provided that:

(i) Such picric acid is so kept and conveyed as not to be liable, whether under the action of fire or otherwise, to come in contact with any substance specified in the annexed schedule or with any fire or light capable of igniting such picric acid;

(ii) such picric acid when dry is contained in a packet from which the contents cannot escape; and in the construction of which no metal other than aluminium or an alloy containing not less than 90 per cent of alluminium is used;

(iii) each package is legibly marked "picric acid;"

C E S Rao

(iv) if the picric acid is contained in glass bottles, the stoppers shall not be of glass.

SCHEDULE.

Any of the following metals or metallic oxides, namely lead, oxide of lead, oxide of iron, potash, baryta, lime, soda, oxide of zinc, **oxide** of copper; and any compound of such metal or oxide (other than a metallic sulphate), or any chlorate, nitrate, or other oxidising agent; or any other substance declared by Government to be capable of forming with picric acid a dangerous compound.
